Subject Index

A cell, 72, 388, 540, 654
Acetaldehyde, *673*
Acetoacetate, see Ketone
Acetylcholine, 281, 388
Acid cholesterol ester hydrolase, 625
Acyl-amino-alcyl benzoic acid derivative, 501
Adenine nucleotide translocase, *664*
Adolescence, 517
Adrenal epinephrine secretion, 299
Adrenergic blockade, 482
Alanine, 113
Alcohol, *672*
Aldosterone, *669*
Alloxan, 66, *664, 675*
Amino acids, 563, *672*
Aminoisobutyric acid, 213
Amylase isoenzymes, 129
Angiotensin II, *669*
Antibody
– dependent cell-mediated cytotoxicity, 106
– to human insulin, *673*
– islet cell, 471, see also Pancreatic islet cell
Apolipoprotein
– A-I, 535
– A-III, *668*
APUD cells, 314
Arginine, 495, 541
Artificial endocrine pancreas, 113
Atherosclerosis, 155
Atropine, 217, 366, 402
Autoimmunity, 471, *675*
Autonomic nervous system
– and gastroenteropancreatic system, 314
– and glucagon and insulin secretion, 411
– and hypothalamic integration, 378
– reversible abnormalities, 475
– and somatostatin, 388
Autonomic neuropathy, 244
Autoradiography, 237, 255
Axonal transport, 110

Baboons, 274
Basement membrane
– muscle capillary, *664*
– thickening, 205
BAY g 5421, 586
B cell
– autonomic control, 388
– denervation, 393
– function, 511
– human, cultured and reovirus type 3, 462
– in human neonates and infants, 540
– innervation, 228
– plasma membrane, *669*
– purification, 654
– residual function in IDD, 530
– secretion in edible dormouse, 489
– in transplanted islets, 237
Beat-to-beat variation, 190
Beta-endorphin, 1, 305, *672*
Beta-hydroxybutyrate, see Ketone
Beta-microglobulin, 199
Biothesiometer, *670*
Blood-brain barrier, 246
Blood-retinal barrier, 597
Bombesin, 299, 305
Bone mass, 145
Brain
– metabolism, 246
– neurotransmitter synthesis, 281
Brown fat, 343, 362
Buformin and lactic acidosis, 45

Calcitonin, 547
Calcium, 343, 547
45-Calcium, *669*
Calf, *665*
Catecholamines, 281, 482
Cation binding sites, *669*
Central nervous system
– action of neuropeptides, 299
– control of metabolism, 299, 343
– and glucoregulation, 1
– and insulin
– – – action, 255
– – – feedback, 274
– modulation of pancreatic exocrine function, 417
Cephalic-phase insulin response, 393
Chlorpropamide, 22, *669, 672*
Chlorpropamide-alcohol flush, 510, *673*
Cholecystokinin, 305, 325
Cholesterol, 22
Choline, 281
Circumventricular organs, 255
Claudication, *666*
Clearance, 223
Clofibrate, *673*
CNS, see Central nervous system
Collagenase, 630
Column chromatography, *676*
Complement, *677*
Control of meal size, 305

Springer International

It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproduction of similar nature, and translations.
Photographic reproduction, microform, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

The use of general descriptive names, trade names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations and may accordingly be used freely by anyone.

Special Regulations for the USA: The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that in the USA copies may be made for personal or internal use, provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970. If a code does not appear copies of the article may be made without charge, provided permission is obtained from the publisher.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Important Note for Authors: Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin, it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.
